Dear Property Owners,

After several years of investigation and testing by Lake County General Health District, the City of Kirtland has been issued Findings and Orders by the Ohio EPA mandating the installation of sanitary sewers through much of our Old Town area. As such, I am writing to you to inform you that the City of Kirtland will hold a virtual Public Forum at 10:00 a.m. on Saturday, January 30th via Zoom. To access the Zoom meeting use the website link: <https://zoom.us/j/4402563332>. Meeting ID of 440 256 3332. Alternately, residents can attend audibly by dialing (312) 626-6799 and input the meeting ID of 440 256 3332. This link can also be reached directly from our city's website www.kirtlandohio.com. The public forum will be hosted by myself, Councilwoman Kelly Wolfe, City Engineer Courtney, and Service Director Fornaro as well as representatives from Lake County Department of Utilities.

This informational and interactive meeting will be an opportunity for open discussion with our affected property owners as well as examine the project's scope, timeline and costs. In the meantime, I invite you to review the accompanied summary and Q&A developed thus far. Additionally, a one-hour video presentation can be viewed by going to the – **Resident Information** - "News and Press Releases" - page of our city website. I highly recommend taking time to watch this video as it offers much background and insight for the project.

We understand that not everyone has access to the technology necessary to participate in a Zoom meeting. If you are unable to attend the Zoom meeting, please do not hesitate to call my office at 256-3332, ext. 5 to schedule a phone call or an in-person meeting with me.

Thank you in advance for your participation and cooperation as we work to develop the best solutions for you and for our great city.

Best regards,

Kevin F. Potter
Mayor
